

① Rogers & Moore

Cik Plantin et al → platformization of infrastructure & infrastructure organization of platforms. → infrastructure shapes relationship between, also Snick 43
platform urbanism → "twist on Snick's" Platform capitalism →

"foreground the possibility that there are emergent, irreducible, co-generative dynamics b/w platforms & the urban". But what is the urban? Is this "speculat[ion] substitut[ion]" necessary?

② Richardson → look @ uber - points out only novel element in config is software. (disagree since its all entire arrangement that's new, plus changes in transit, congestion, taxi industry (see ^{Ström?}) etc.)

Richardson → "platform urbanism could describe a shift away from ownership as a straightforward method for distinguishing b/w public & private"...

↳ highlights public infrastructure as accessible for free or w/ payment at pt of use or subscription. While hist. state mediates such services to "the public" → now, w/ platform services afford similar "accessibility & ubiquity" - w/ online, manipulates. Crucially, what matters →

↳ quote the platforms assoc. w/ privatization → "software platforms provide one ex of how urban material processes shift forms of publicness!"

③ Krivy

12

"How is platform capitalism a platform urbanism, a variant of Henri Lefebvre's much-discussed thesis that the society has been completely urbanized?"

↳ Has complete urbanization rendering 'city' obsolete become no longer a virtual process but real, marked by the "smart city", Krivy asks.

Krivy criticizes planetary urbanizations focus on the "infrastructural character of the urban beyond any formal & scalar specificity" to the detriment of attention to "historically specific technologies of govt" contributing to implosions & explosions.

AGREE ^{Krivy} "The urban is absent from Sennet's account of platform capitalism, most

conspicuously when he questions the viability of lean platforms!!"

↳ "we need to ^{also} consider the ^{spec. financialization} of platforms ~~platformization~~ "platformization" of the urban itself"

↳ ^{Krivy} platform as explosion of enclave-capital (implosion (Jamison) urban

(4) ^{sarah} Barns

13

"platforms... are... reprioritising our attention"

- ↳ platforms create spaces — API — innovate
 - ↳ new market

play a business strategy → // Dalton

platforms — not just advertising → not exactly human ecosystem

"Companies like Google & Facebook can commoditize their platform ecosystem by selling user attention to advertisers — but they also leverage the data exhausts of our daily interactions to generate new software services"

data trails, traces, etc, see Ström

- ↳ or see Smidak, create new services to sense & collect data/traces, ED interactions — Nest, Home, Alexa, etc.

- ↳ platforms → material urban infrastructure even → "functional reconstitution of city design & services as a platform"

- ↳ platforms → individual everyday social spaces

maybe perfect entry pt to thing structure in EU etc

platform urbanism, enacted daily... ^{put in in} deeply note, (4)
implicates the everyday urban encounter. Put ↳ add pic of skyline & Rogers
Simply, platform urbanism is not only a
problem of political economy, nor even of
digital strategy, but also of

everyday socio-spatial practice"

↳ "we are... being encouraged to facilitate this spatial
reproduction ourselves, through our everyday intimate
encounters w/ urban life"

Why → bc platform → operates on everyday
use, sociality, sale of etc →
perfect object of analysis to explore
structural in everyday → & argue importance
of "urban everyday" as a scale analytic -
a diagnostic apparatus for exploring
how structural articulates in everyday
& this possibilities for countering praxis.

↳ as Sarah Barris says →

not only critical interrogation →

"platform urbanism... a site for radical
spatial practice"

↳ reach out

⑤ Wilson

15

"thinks [?] platform urbanism through how platforms enable what bodies might do, what bodies might think."

↳ Cites Gillian Rose - need to read p.c.e still - reworking of human in digitally mediated city.

↳ talks abt the technicity of maps → could // to mapping or technicity.

→ "the map as an artifact of the times & spaces of map use, rather than a clarified ~~version~~ vision of reality"

maps → as "objects w/ technicity"
"can be applied to a variety of technoscientific solutions to socio-technical problems" → "digital technologies"
"are our phantoms, both our poison & our cure"

platforms
maybe useful? "Quantified self-city - nation signals a multiscale system of attention control, where the organization of an individual body, its mts & stasis, becomes the metric resource for the urbanism of bodies, both human & MTH"

↳ think

⑥ John Stehlin — talk if I liked this contribution

16

the platform & the urban sharing the logic of nest —
both being "built environments whose nature entwining
creates landscapes of locational advantage that
bridges the physical & the digital."

↳ "secondary circuit of capital"

platforms, often Simick — to 1234 —
so does the urban

↳ "urban platforms → infrastructures for
the extraction of place-based value
a accessible way thru that platform → "

"they de-territorialize the existing built environ.,
re-territorializing it in a new physical-
digital composition, w/ the app as a
portal to this ensemble."

↳ true for Vancouver every rip

↳ Hase makes me think of
silly platform → no \$ exchange —
since everyone is AirBnB & Uber.

↳ that can drive → Julio Torres

6 continued Stehlin

7

↳ "right to the city → right to the platform"

algorithm & fictitious commodification of urban life by platforms.

↳ "reappropriate platform city" rather than unplug, in his opinion

7 Lizze Richardson

good critiques, gesting, postcard of universalism when we talk abt platform urbanism

↳ critiques platform as focal pt for examining how cities work"

how otherwise? → "exposed approach to understanding ~~what an urban technology is~~"

8 Maroš Krivý

opt out - luxury

Stoim

→ "How can forms of exploitation diffused across the city be resisted, & what forms of tactical & strategic organization could challenge what Karen Yueng calls 'mash as budget'?"

(8)

Frivv also wars against redug when to the
city → Wilson & Terrill Gabrys → think
platform when sm across seeds . . . →
ind → see ~~this~~ excent gestures — superment

⑨ Sarah Barnes

"Critical to the infrastructuralization of platforms
has not only been the extraction of value by
platform owners, but the facilitation of
value-trading by diverse platform participants"

"When we tweet, post, like it here, google,
& tweet, we choose to participate in the
platformization of our everyday lives"

↳ "it is through the everyday ecosystems
of interaction that platforms encourage us
to engage in, . . . that their capacity
to emerge as infrastructures governing
the city has been facilitated"

(9) continued Sarah Barrs **This**

"platform urbanism as a mode of 'everyday' urban intervention, a site of urban spatial practice, disrupting media interventions in the everyday spaces of the city, calling into question the valorization of urban data as a way of knowing the city."

(10) Matt Wilson

(11) ^{John} Stehelin — Look up John **Stehelin & Sarah Barrs**

↳ micro transit → real-time market in urban space

↳ pair w/ pictures

↳ ~~Lecczynski~~ Lecczynski → on bike share in Vancouver particularly

Red Plenty

12 - Scott Rogers & Susan Moore
